TEXAS
COMMISSION
ON ENVIRONMENTAL
QUALITY

Dear Sir,

Owners of properties subject to effluent and runoff from the proposed Lennar Development (CN602412207) project in Montgomery County Texas, adjacent to Roman Forest Blvd and crossing US59 (WQ0015065001), request a hearing to address the following issues.

- 1) The alteration of existing drainage from the proposed site as described in the application to reroute the effluent to flow South to Caney Creek, through 'Pumpkin Gully' a normally dry outflow instead of the existing drainage route to the East.
- 2) Alteration of existing soil percolation and resulting increase outflow into 'Pumpkin Gully' as development progresses.
- 3) Other issues resulting in rerouting of storm water that normally now flows adjacent to Railroad Road and across Corner Reinhart road into Caney Creek.
- 4) Potential resultant erosion of 'Pumpkin Gully' due to the increase in total flow as a result of the development.
- 5) Other potential issues resulting from potential degradation of habitat from the development.
